

TECHNICAL SPECIFICATIONS – FILTER CASSETTE

Length	1,090 mm
Width	739 mm
Height	72 mm (129 mm incl. mounting handle)
Weight incl. mounting handle	15 kg
Filter cassette material	Seawater resistant aluminum. Bolts and nuts C4 stainless steel. Rubber gasket. Optional coating to reduce adhesion of oil etc.
Mount in FEB-I	Filter cassette locks into T-bar at the bottom of FEB-I and mounting handle locks into mounting brackets above the water/oil level.
Filter capabilities	Hydrophilic and lipophilic filter - allows water to pass but prevents oil from passing through.
Filtration capacity	3,000 liter/minute.
Durability of the filter	Depending on exposure to oil. The filter is effective until saturated with oil.
Exchange of filter cassette(s)	FLEX-FEB offers exchange of used filter cassettes.
Other features	Filter cassette can be exchanged during operation. Additional flexible protection plate to avoid mechanical damage to the filter.
